

### **Appendix 3: Sample Questions for Class Survey (via Google Forms and short answer questions)**

1. What brings you to this class? Do you have specific goals or interests that you hope to pursue over the course of this semester?
  2. Will you have access to the following: a laptop or desktop with word processing, reliable internet connection, a webcam, a safe, distraction-free workspace?
  3. If you have responded “no” to any of the previous items, will you need help getting access to these materials or potentially accessing this course asynchronously?
  4. Do you have any specific accessibility needs and accommodations?
  5. What challenges do you face with remote learning and online content? What strategies have you encountered in the past that you have found helpful for your learning? Do you have any other questions or concerns that I may address before the semester begins?
- (I will be doing this survey again in the middle of the semester to touch base with you again on how the course is going).
